# BIM Assure

Get models you can trust.

BIM Assure's intelligent rules search your models and highlight data issues important to you.

Now you can easily find missing or incorrect information that can lead to miscommunication, problems and project delays.
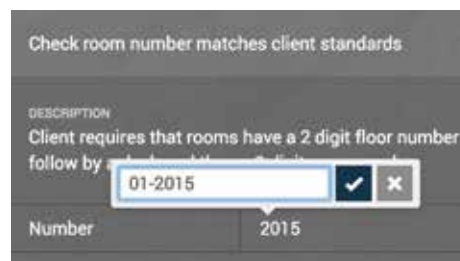

Automates Model Checking

Intelligent rules save a significant amount of model checking time while reducing project risk

Currently, BIM users spend massive amounts of time checking models for issues. Also, manual model checking is often incomplete and error-prone.

Intelligent rule-based analysis of building models highlights data issues and reduces the need for manual model checking.

Unlocks BIM Data

Get rid of bottlenecks for managing information and share your models and data with anyone on the project team

Often, your building information is locked in complex authoring tools designed for highly trained modelers.

BIM Assure lets any project member, with the appropriate permissions, fix data issues and enter missing data in an easy-to-use, Web-based app.

Delivers Valid, Data-Rich Models

Better information means you can trust your models for a wide range of workflows – driving additional value from your investment in BIM tools

With dozens of team members working under tight deadlines, it's hard to tell if BIM data is missing or inconsistent.

BIM Assure validates that your models are accurate and complete. You'll know your models are ready to go!

BIM Assure

Get models you can trust.

Easy as 1, 2, 3.

BIM Assure's workflow is simple:

1. Publish directly from your BIM authoring tools to BIM Assure

2. Use BIM Assure's templates or create your own rules to find and fix data issues. Anyone on the team can view and manage data

3. In the authoring tool, sync the fixes back into the original model.

1 PUBLISH MODELS

2 SHARE MODELS FIND ISSUES MANAGE DATA

3 SYNC FIXES

BIM AUTHORING TOOLS

Your Success Assured

Easy-to-use: BIM Assure is designed to be simple to set up and use. From setting up projects, to configuring rules, to managing BIM content and team members - you'll be ready to roll in no time.

Jump start with templates: You don't have to start from scratch! BIM Assure includes a growing library of analysis templates that you can use to address a wide range of BIM data needs. From common checks for day-to-day model data issues to robust templates targeted at specific workflows, BIM Assure's templates will help you realize value quickly.

We're there when you need us: The BIM Assure application services team is staffed by skilled industry consultants with dozens of years of experience in AECO workflows. When you need support or training, we'll be ready.

Our goal? You'll get better BIM data right out of the gate!
